

ABC Associates Hosts:

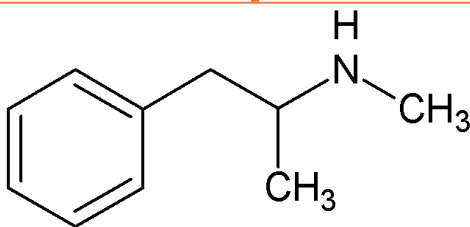

Methamphetamine: A Complete Overview

Presented by: Mike Palladini & Christopher Cook

This training will provide an overview of the drug methamphetamine (MA), its origins and history as a chemical, pharmaceutical, and recreational substance. The effects of MA will be reviewed, focusing on the drug's pharmacology, its various forms and relationship to other stimulants. Production of MA and its prevalence will be discussed, including clandestine laboratory involvement, international trade, legal status and treatment options. The effects and continued impact of MA use on the individual will be viewed through a continuum of experiential symptomology.

Friday, October 20th from 9am-12pm

**3 PCB Credits
COST: \$20**

**Training will be held at
ABC Associates
1122 7th Avenue
Beaver Falls, PA 15010**
